some of their programs but I believe that we can perhaps
get some of the private radio stations to have some of
these programs and I suggest that we talk to the private,
to some of the private radio stations in doing this. I
think that our private radio stations are doing a terrific
job and we need to keep them and, therefore, I would urge
you to vote down this bill.

PRESIDENT: There are no further lights. Senator Newell,
did you wish to be heard on this?

SENATOR NEWELL: Am I the last to be heard on this issue?

PRESIDENT: No.

SENATOR NEWELL: Then I call the question.

PRESIDENT: We have only got two minutes before the five
minutes to close, so in view of that, I will...

SENATOR NEWELL: Mr. President, this five minutes to close,
can I have Senator Fowler use my time as closing.

PRESIDENT: You can ask.

SENATOR NEWELL: Yes, Senator Fowler, would you like to
use it?

SENATOR FOWLER: Okay, is this the closing on the bill?

PRESIDENT: Well, we started, we have seven minutes total
and five of that is for closing and Senator Newell has
yielded his time to you.

SENATOR FOWLER: Are there any other, I guess the question
I have then...

PRESIDENT: Yes, Senator Kahle's light is on. Senator
Kahle.

SENATOR FOWLER: And then I would take the five minutes
of closing.

PRESIDENT: Senator Kahle.

SENATOR KAHLE: Mr. President, members of the body, I
have been threatened. I'd like to ask a question of
Senator Dworak, I believe, if I could. I will ask the
question while you are walking about. What does this
really do now? You have taken the money out of the
bill but why are we passing the bill then?

SENATOR DWORAK: The amendment I put in there, Senator
Kahle, also provided that the commission perform a study
and come back to the Legislature with recommendations
on it.

SENATOR KAHLE: Well, this bothers me a little. I would
think that the bill should have been killed and the resolu-
tion put in for the study because I am afraid we are going
to slip this public radio in on us without due process
next year, if the bill is passed.
